

The garbage separation support app

さんあ〜る[®]

for iPhone
for Android

"Have you ever wondered how and when to separate recyclables and garbage?"

The garbage separation promotion app 「さんあ〜る (“San Aru”)」 allows you to easily search for separation methods and notifies you of collection dates.

Collection date calendar

- By entering the area where you live, you can check the collection dates and items in a calendar format.
- An alarm will notify you of collection dates.

Recyclables / Garbage Separation Guide

- You can check for detailed sorting methods, disposal methods, and precautions for various materials in the guidebook.

Search by Sorting Type

- You can search for the sorting category of recyclables and garbage by item name.

Notifications

- You can check information about recyclables and garbage.

App installation

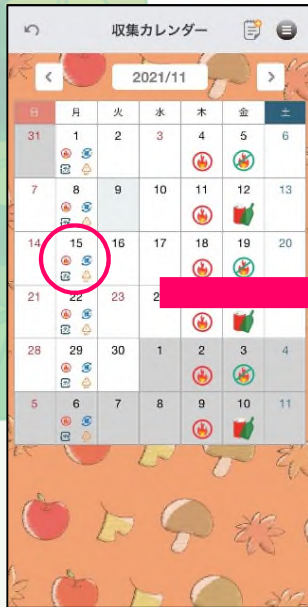

You can search for "ThreeR" on the App Store or Google Play, or install from the QR code above.

How to use **さんあ〜る**[®]

1 Confirmation of collection date / confirmation of sorting methods

You can check the collection dates on the calendar.

You can check sorting method details by tapping the icon on the right of the sorting category.

2 Search for sorting categories

Tap the **Q** mark, enter the name of the item you want to look up, or search the sorting category from the item list (alphabetically).

3 Confirmation of collection sites for recyclable resources

You can check the address, collection date & time, and collection items of the collection sites and collection cooperation stores for each type of resource.
